TASK 1: VEHICLE SAFETY INSPECTION AND WORKSHOP PREPARATION

Task reference: Block_1_Task_1_Vehicle_Safety_Inspection

Task overview

Block
Block 1 - Induction, Safety and Core Workshop Skills

Weeks
Weeks 1-10

Duties covered
1, 2, 3, 4, 5

KSBs covered
K1, K2, K5-K13, K24, S1-S10, B1, B2

Estimated duration
60 minutes

Assessment type
Practical / knowledge / documentation

Scenario

A customer vehicle has arrived for an initial safety inspection. You must prepare the work area, use PPE correctly, complete a structured inspection and record any safety-related findings without carrying out repairs.

Objectives

- Prepare the vehicle and workstation safely before inspection.
- Carry out a basic safety inspection using a methodical routine.
- Identify visible defects and record recommendations clearly.
- Demonstrate correct PPE, housekeeping and documentation practice.
- Explain which findings would require customer authorisation before work.

Materials you need at the workstation

- Light vehicle with inserted inspection defects
- Vehicle inspection checklist
- Torch, tread depth gauge and tyre pressure gauge
- PPE and workshop safety equipment
- Apprentice Assessment Record

Complete all relevant fields. Enter N/A where a field does not apply.

Practical task instructions

1. Ensure the working area is safe and the vehicle is correctly prepared before starting work.
2. Carry out external, under-bonnet, in-vehicle and raised-vehicle checks as instructed.
3. Record all inspection findings using clear workshop terminology.
4. Identify any safety-critical defects and explain them to the assessor.
5. Reinstate the vehicle and workstation to a pre-assessment condition.

Vehicle or equipment details

Vehicle make

Mileage / hours

Vehicle model

Engine size / system type

Registration / fleet number

VIN / chassis / equipment ID

Work completed and safe working

Brief description of work carried out and any further recommendations

PPE worn and special precautions taken

Technical data and measurements

Tyre tread depth NS/F

Tyre tread depth OS/F

Tyre pressure NS/F

Tyre pressure OS/F

Brake fluid condition

Battery security check

Lights/warning lamps check

Wheel torque setting

Special tools including any required calibration

Knowledge questions

1. Why must PPE be selected before starting the task?

2. State the minimum legal tread depth for a car tyre.

3. Why should defects be recorded clearly before speaking to the customer?

Knowledge questions continued

4. What checks must be completed before raising a vehicle?

5. Explain how poor housekeeping can create a workshop risk.

6. Which defects would you class as safety critical?

7. What further work or customer authorisation may be required?

Assessor observation notes

Record observations, evidence reviewed and any areas requiring further development

TASK 1: BLOCK 1 APPRENTICE ASSESSMENT

Declarations, sign-off and assessment decision

Assessment declarations

Apprentice declaration: I confirm that the work recorded in this assessment document is my own work and that I completed the task under the conditions stated.

Assessor declaration: I confirm that I have observed and/or reviewed the evidence recorded in this document and that the assessment decision is accurate.
