TASK 4: BASIC BRAKE AND TYRE CONDITION CHECK

Autocare Technician Level 2 | Block 1 | v2.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 1-10**

Your task

A vehicle has been reported with possible tyre and brake wear during a basic workshop check. You must inspect visible brake and tyre components, record measurements and explain any customer recommendations.

What you must do

1. Prepare the vehicle and work area safely.
2. Inspect tyre condition, tread depth, pressure and visible damage.
3. Inspect visible brake components and record condition.
4. Record wheel torque setting and any relevant technical data.
5. Explain findings to the assessor/workplace mentor and reinstate the workstation.

What good evidence looks like

SAFE SETUP

Suitable PPE, a prepared work area and controlled vehicle or equipment.

CORRECT METHOD

A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE

Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS

Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Light vehicle
- Tread depth gauge and tyre pressure gauge
- Wheel brace/torque wrench
- Brake inspection tools
- Manufacturer technical information
- Apprentice Assessment Record

SOW ALIGNMENT

Block 1 - Induction, Safety and Core Workshop Skills
Duties: 1, 2, 3, 4, 5 KSB evidence focus: K1, K2, K5-K13, K24, S1-S10, B1, B2
Task reference: Block_1_Task_4_Basic_Braking_and_Tyre_Check

Task evidence

PPE and precautions used

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. What are the legal tyre requirements for tread depth?

2. Why must tyre pressures be checked before assessing wear?

Knowledge check - continued

3. (a) What brake defects may be identified during a visual inspection? (b) What customer symptoms may indicate tyre or brake issues?

4. Why is wheel torque important after wheel removal?

5. (a) How would you explain an advisory tyre defect to a customer? (b) What documentation should be completed after the check?

Assessor/Workplace Mentor observation

- ☐ Carry out brake and tyre checks using safe working practices.
- ☐ Measure tyre tread depth and inspect visible brake condition.
- ☐ Record findings, wheel torque and customer recommendations.
- ☐ Identify legal or safety concerns using evidence.
- ☐ Explain how tyre and brake condition affects vehicle safety.

Assessor/Workplace Mentor observation notes

Decision and feedback

Decision - select one

- ○ **PASS**
- ○ **REFER**

Evidence reference

Feedback and action required

Sign-off

Signatures confirm that this is the apprentice's own work and that the evidence and decision are accurate.
