TASK 1: BATTERY AND CHARGING SYSTEM INSPECTION

Task reference: Block_2_Task_1_Battery_and_Charging_Check

Task overview

Block
Block 2 - Inspection, Servicing and Customer Interaction

Weeks
Weeks 11-20

Duties covered
1, 2, 3, 4, 5, 6

KSBs covered
K5-K14, S5-S10, B1, B2

Estimated duration
45 minutes

Assessment type
Practical / knowledge / documentation

Scenario

A customer reports slow cranking and intermittent starting concerns. You must carry out basic battery and charging system checks, record results and explain whether further work is required.

Objectives

- Inspect battery condition and security safely.
- Take relevant electrical measurements using a multimeter or tester.
- Interpret basic battery and charging results.
- Record findings using clear documentation.
- Explain the next steps to the customer or assessor.

Materials you need at the workstation

- Light vehicle with 12V battery
- Multimeter or battery tester
- Manufacturer technical information
- PPE and battery handling equipment
- Apprentice Assessment Record

Complete all relevant fields. Enter N/A where a field does not apply.

Practical task instructions

1. Prepare the vehicle and confirm the complaint with the assessor.
2. Inspect battery security, terminals and visible condition.
3. Measure battery voltage and charging voltage as instructed.
4. Record results and compare with manufacturer or accepted values.
5. Reinstate the vehicle and workstation to a pre-assessment condition.

Vehicle or equipment details

Vehicle make

Mileage / hours

Vehicle model

Engine size / system type

Registration / fleet number

VIN / chassis / equipment ID

Work completed and safe working

Brief description of work carried out and any further recommendations

PPE worn and special precautions taken

Technical data and measurements

Battery voltage

Charging voltage

Battery rating

Battery terminal condition

Earth lead condition

Alternator belt condition

Battery security

Relevant DTCs if checked

Special tools including any required calibration

Knowledge questions

1. Why is battery condition checked before replacing starting components?

2. What safety precautions apply when working around batteries?

3. What can low charging voltage indicate?

Knowledge questions continued

4. Why should terminals and earth connections be inspected?

5. How would you explain a weak battery result to a customer?

6. What further checks may be required if the fault remains?

7. What evidence should be recorded for the job card?

Assessor observation notes

Record observations, evidence reviewed and any areas requiring further development

TASK 1: BLOCK 2 APPRENTICE ASSESSMENT

Declarations, sign-off and assessment decision

Assessment declarations

Apprentice declaration: I confirm that the work recorded in this assessment document is my own work and that I completed the task under the conditions stated.

Assessor declaration: I confirm that I have observed and/or reviewed the evidence recorded in this document and that the assessment decision is accurate.

Apprentice sign-off

Apprentice name

Date signed

Apprentice signature

Assessor sign-off

Assessor name
