TASK 1: STEERING COMPONENT REPLACEMENT AND CUSTOMER RECOMMENDATIONS

Autocare L2 | Block 7 | Apprentice instructions | v1.1

Task reference: Block_7_Task_1_Steering_Component_Replacement

Task overview

Block
Block 7 - Advanced Workshop Practice and Communication

Weeks
Weeks 61-70

Duties covered
1-10

KSBs covered
K14-K20, S10-S15, B1, B2

Estimated duration
60 minutes

Assessment type
Practical / knowledge / documentation

Scenario

A vehicle has steering play or a worn steering component. You must inspect the relevant area, remove/refit the component as instructed, record technical data and explain the customer recommendations.

Objectives

- Inspect steering components safely and accurately.
- Remove and refit a steering component as instructed.
- Record torque settings and component condition.
- Identify alignment implications and safety concerns.
- Explain work and recommendations clearly.

Materials you need at the workstation

- Light vehicle or steering rig
- Replacement steering component where required
- Manufacturer technical information
- Torque wrench and general tools
- PPE and Apprentice Assessment Record

Complete all relevant fields. Enter N/A where a field does not apply.

Practical task instructions

1. Prepare the vehicle and confirm safe lifting/support arrangements.
2. Inspect steering components and identify the fault.
3. Remove and refit the component instructed by the assessor.
4. Record torque settings and any alignment requirement.
5. Reinstate the vehicle and explain customer recommendations.

Vehicle or equipment details

Vehicle make

Mileage / hours

Vehicle model

Engine size / system type

Registration / fleet number

VIN / chassis / equipment ID

Work completed and safe working

Brief description of work carried out and any further recommendations

PPE worn and special precautions taken

Technical data and measurements

Steering system type

Component replaced

Track rod nut torque

Wheel torque setting

Toe setting before

Toe setting after

Alignment required yes/no

Post-repair check result

Special tools including any required calibration

Knowledge questions

1. Why is steering system condition safety critical?

2. Why should the number of turns be noted when removing a track rod end?

3. What defects may be found on steering joints or racks?

Knowledge questions continued

4. Why may alignment be needed after steering repairs?

5. How can steering faults affect tyre wear?

6. How would you explain the repair to a customer?

7. What final checks are required before release?

Assessor observation notes

Record observations, evidence reviewed and any areas requiring further development

Assessment declarations

Apprentice declaration: I confirm that the work recorded in this assessment document is my own work and that I completed the task under the conditions stated.

Assessor declaration: I confirm that I have observed and/or reviewed the evidence recorded in this document and that the assessment decision is accurate.
