TASK 1: EV/HYBRID CUSTOMER HANDOVER AND CHARGING AWARENESS

Task reference: Block_9_Task_1_EV_Customer_Handover

Task overview

Block
Block 9 - Emerging Technology, EV and Hydrogen

Weeks
Weeks 81-94

Duties covered
1, 2, 4, 5, 8, 10

KSBs covered
K18-K23, S10-S15, B1, B2

Estimated duration
60 minutes

Assessment type
Practical / knowledge / documentation

Scenario

A customer asks for advice after an EV/hybrid service or warning message. You must complete non-invasive checks, prepare a customer handover explanation and identify safe referral points.

Objectives

- Carry out safe EV/hybrid awareness checks.
- Record charging or warning information without invasive HV work.
- Explain customer guidance in plain English.
- Identify when specialist referral is required.
- Document safe limitations and next steps.

Materials you need at the workstation

- EV/hybrid vehicle, rig or case-study pack
- Charging information or customer FAQ sheet
- Manufacturer safety information
- HV awareness PPE where appropriate
- Apprentice Assessment Record

Complete all relevant fields. Enter N/A where a field does not apply.

TASK 1: BLOCK 9 APPRENTICE ASSESSMENT

Practical task instructions and apprentice assessment record

Practical task instructions

1. Confirm the customer concern and check available vehicle information.
2. Identify visible EV/hybrid components, warning labels and charging information.
3. Record any non-invasive observations or advisory notes.
4. Prepare a customer handover explanation including limitations.
5. Explain referral requirements and complete documentation.

Vehicle or equipment details

Vehicle make

Mileage / hours

Vehicle model

Engine size / system type

Registration / fleet number

VIN / chassis / equipment ID

Work completed and safe working

Brief description of work carried out and any further recommendations

PPE worn and special precautions taken

Technical data and measurements

Vehicle/system type

Warning message

Charging connector/type

Visible safety labels

Customer concern

Checks completed

Referral required

Customer advice summary

Special tools including any required calibration

Knowledge questions

1. What information should be included in an EV customer handover?

2. Why must high-voltage components not be disturbed at this level?

3. What customer concerns are common with EV range or charging?

Knowledge questions continued

4. How should limitations of the inspection be explained?

5. What evidence should be recorded for referral?

6. Why is accurate customer communication important with emerging technologies?

7. How would you respond if the customer asks for work beyond your competence?

Assessor observation notes

Record observations, evidence reviewed and any areas requiring further development

Assessment declarations

Apprentice declaration: I confirm that the work recorded in this assessment document is my own work and that I completed the task under the conditions stated.

Assessor declaration: I confirm that I have observed and/or reviewed the evidence recorded in this document and that the assessment decision is accurate.
