TASK 4: TPMS, TYRE PRESSURE AND CUSTOMER DOCUMENTATION

Autocare Technician Level 2 | Block 2 | v2.1

TIME	EVIDENCE	PROGRAMME POINT
45 minutes	**Practical | Knowledge | Documentation**	**Weeks 11-20**

Your task

A vehicle has arrived with a tyre pressure warning lamp illuminated. You must inspect tyre condition and pressures, identify the TPMS type where possible, carry out a reset/relearn where appropriate and record customer-facing findings.

What you must do

1. Prepare the vehicle and confirm the TPMS warning concern.
2. Check tyre pressures and inspect tyre condition.
3. Identify TPMS system type and reset/relearn as instructed.
4. Record findings, pressures and any customer recommendations.
5. Reinstate the vehicle and workstation.

What good evidence looks like

SAFE SETUP
Suitable PPE, a prepared work area and controlled vehicle or equipment.

CORRECT METHOD
A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE
Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS
Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Light vehicle with TPMS
- Tyre pressure gauge
- TPMS tool or scan tool if available
- Manufacturer technical information
- PPE and Apprentice Assessment Record

SOW ALIGNMENT

Block 2 - Inspection, Servicing and Customer Interaction
Duties: 1, 2, 3, 4, 5, 6 KSB evidence focus: K5-K14, S5-S10, B1, B2

Knowledge check

1. What is the difference between direct and indirect TPMS?

2. Why must tyre condition be checked before resetting TPMS?

Knowledge check - continued

3. (a) What faults can cause a TPMS warning lamp? (b) What precautions are needed when working near TPMS valves?

4. Why should wheel positions be recorded where relevant?

5. (a) How would you explain the TPMS warning to a customer? (b) When should the task be referred for further diagnosis?

Assessor/Workplace Mentor observation

- ☐ Inspect tyres and pressures safely and methodically.
- ☐ Identify direct or indirect TPMS operation where possible.
- ☐ Carry out or explain the correct reset/relearn procedure.
- ☐ Record technical data and customer advice clearly.
- ☐ Recognise when specialist TPMS diagnosis is required.
