TASK 4: EV/HYBRID COMPONENT LOCATION AND SAFETY AWARENESS

Autocare Technician Level 2 | Block 4 | v2.1

TIME	EVIDENCE	PROGRAMME POINT
45 minutes	**Practical | Knowledge | Documentation**	**Weeks 31-40**

Your task

A hybrid or electric vehicle/rig is being used for awareness training. You must identify visible EV or hybrid components, explain their function and show safe non-invasive working boundaries.

What you must do

1. Prepare the work area and confirm the vehicle/rig is safe for awareness activity.
2. Identify visible EV/hybrid components as directed by the assessor/workplace mentor.
3. Explain the basic function and risks of selected components.
4. Record any safety warnings, limitations and referral requirements.
5. Reinstate the vehicle/rig and workstation.

What good evidence looks like

SAFE SETUP
Suitable PPE, a prepared work area and controlled vehicle or equipment.

CORRECT METHOD
A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE
Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS
Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Hybrid/electric vehicle or training rig
- Manufacturer safety information
- HV awareness PPE where appropriate
- Warning label examples
- Apprentice Assessment Record

SOW ALIGNMENT

Block 4 - Emerging Technology and Driveline Systems
Duties: 1, 3, 4, 5, 6, 7, 8, 9, 10 KSB evidence focus: K16-K20, S10-S13, B1, B2

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why must high-voltage work be referred to a qualified person?

2. What does orange cabling normally indicate?

Knowledge check - continued

3. (a) Why is the 12V system still important on EV/hybrid vehicles? (b) What information should be recorded before working near EV systems?

4. How would you explain safe limitations to a customer?

5. (a) What should you do if a warning label or fault message is present? (b) Why is this activity non-invasive at Level 2?

Assessor/Workplace Mentor observation

- ☐ Identify main EV/hybrid components from a safe position.
- ☐ Explain the basic function of high-voltage and low-voltage systems.
- ☐ Recognise warning labels and high-voltage risk areas.
- ☐ Record safe boundaries and referral requirements.
- ☐ Communicate limitations to the assessor/workplace mentor or customer.

Assessor/Workplace Mentor observation notes

Decision and feedback

Decision - select one

- ○ **PASS**
- ○ **REFER**

Evidence reference

Feedback and action required

Sign-off

Signatures confirm that this is the apprentice's own work and that the evidence and decision are accurate.
