TASK 4: AIR CONDITIONING AND CLIMATE-CONTROL CHECKS

Autocare Technician Level 2 | Block 6 | v2.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 51-60**

Your task

A customer reports poor cabin cooling or demisting. You must complete non-invasive air-conditioning/climate-control checks, record visible findings and identify when F-gas or specialist referral is required.

What you must do

1. Prepare the vehicle and confirm the customer concern.
2. Carry out visible and functional checks as instructed.
3. Record refrigerant type/quantity information from technical data where available.
4. Identify checks that require qualified F-gas personnel.
5. Explain findings and reinstate the vehicle/workstation.

What good evidence looks like

SAFE SETUP
Suitable PPE, a prepared work area and controlled vehicle or equipment.

CORRECT METHOD
A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE
Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS
Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Light vehicle or AC training rig
- Manufacturer AC information
- Thermometer or scan tool if available
- PPE and warning information
- Apprentice Assessment Record

SOW ALIGNMENT

Block 6 - Systems Integration and Advanced Diagnostics
Duties: 1-10 KSB evidence focus: K12-K19, S8-S15, B1, B2

PPE and precautions used

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why must refrigerant handling be carried out only by qualified personnel?

2. What visible checks can be completed safely at Level 2?

Knowledge check - continued

3. (a) What customer symptoms may indicate an AC system concern? (b) Why is cabin airflow important for demisting?

4. What should be recorded if specialist referral is required?

5. (a) How can environmental responsibilities apply to AC work? (b) How would you explain limitations of the check to a customer?

Assessor/Workplace Mentor observation

- ☐ Inspect visible air-conditioning and climate-control components safely.
- ☐ Carry out non-invasive function checks within competence boundaries.
- ☐ Record refrigerant information without handling refrigerant.
- ☐ Identify likely causes and referral points.
- ☐ Explain customer recommendations clearly.
