TASK 3: WORKSHOP SAFETY, VEHICLE SUPPORT AND TECHNICAL MEASUREMENT

Heavy Vehicle Service and Maintenance Technician Level 3 | Block 1 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
90 minutes (adapt to workplace conditions)	**Practical | Knowledge | Documentation**	**Weeks 1-10 | Months 1-3**

Your task

Prepare a heavy-vehicle work area, complete a task-specific risk check, select suitable tools and safely support an unloaded vehicle or approved training rig before taking and recording technical measurements.

What you must do

1. Confirm the job instruction, hazards, authority and emergency arrangements.
2. Select PPE, tools, support equipment and technical information.
3. Secure and support the vehicle or rig at approved points; verify stability before work.
4. Take specified measurements, apply tolerances and record results accurately.
5. Reinstate the work area, account for tools and report defects or limitations.

What good evidence looks like

SAFE CONTROL

No work beneath a raised vehicle or cab until approved secondary support is fitted and stability is verified.

CORRECT METHOD

A logical sequence using current manufacturer, DVSA, company and task-specific information.

ACCURATE EVIDENCE

Actual values, test conditions, units, findings and evidence references recorded clearly.

SOUND DECISIONS

A justified serviceability, repair, referral or recovery decision followed by appropriate verification.

You will need

- Unloaded heavy vehicle or approved rig
- Measuring tools and manufacturer data
- Rated chocks, stands and lifting equipment
- PPE, risk check and job card

SOW ALIGNMENT

Block 1 - Motor Vehicle Foundation Skills

KSB evidence focus: Controlled Foundation Skills mapping; primary heavy-vehicle link K4

TASK 3: WORKSHOP SAFETY, VEHICLE SUPPORT AND TECHNICAL MEASUREMENT

Practical record

Apprentice, location and vehicle details

Apprentice name

Date

Employer / training centre

Vehicle / trailer make and model

Registration / fleet number

Odometer / hours

VIN / chassis / trailer number

Job card / task reference

Measurements and technical checks

Support point / capacity		Measured value 1	
Specified value / tolerance		Measured value 2	
Tool identification		Calibration / pre-use check	
Result: within limit?		Defect / referral reference	

Special tools, equipment, calibration or technical-information requirements

Task evidence

PPE, precautions and safe-system controls used

Safety-critical findings and immediate action

Work completed, actual findings, diagnosis, recommendations and verification

Knowledge check

1. Why must axle load, vehicle mass and support-equipment rating be confirmed?

2. How do you decide whether a measurement is acceptable?

Knowledge check - continued

3. Explain the checks required before working near a raised cab or supported chassis.

4. What should you do if the technical information conflicts with the job instruction?

5. What evidence proves the work area and vehicle were left safe?

Assessor/Workplace Mentor observation

- ☐ Completes a task-specific risk check and selects suitable PPE.
- ☐ Uses measuring tools correctly and records actual values.
- ☐ Restores the vehicle, equipment and work area safely.
- ☐ Uses rated lifting/support equipment and approved support points.
- ☐ Recognises limits of authority and stops/refers unsafe work.

Assessor/Workplace Mentor observation notes

Decision and feedback

Decision - select one

- ☐ PASS
- ☐ REFER

Evidence reference

Feedback and action required

Sign-off

Signatures confirm that this is the apprentice's own work and that the evidence and developmental decision are accurate.
