TASK 4: FEATHER EDGING, FILLER PREPARATION AND PRIMER READINESS

Vehicle Damage Paint Technician Level 3 | Block 2 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 11-28**

Your task

A repaired area requires controlled feather edging and surface preparation ready for filler or primer surfacer. You must prepare the surface, check contour and record readiness for the next refinish stage.

What you must do

1. Confirm the repair area, substrate and limits of the preparation task.
2. Clean the area and select suitable abrasive grades for feather edging.
3. Prepare the surface gradually, maintaining panel shape and body lines.
4. Check the repair area for pinholes, low spots, contamination or poor edges.
5. Record products, abrasive stages, quality checks and next-stage recommendations.

What good evidence looks like

SAFE SETUP

Suitable PPE, a prepared work area and controlled vehicle, component or equipment.

CORRECT METHOD

A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE

Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS

Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Prepared repair panel or training panel with minor damage
- Abrasives, sanding blocks, guide coat and cleaning materials
- Filler/stopper products where appropriate
- Inspection lamp, straight edge or contour gauge
- Job card and assessment record

SOW ALIGNMENT

Block 2 - Core Paint Preparation, Materials and Workflow
Duties: D1-D5, D10 KSB evidence focus: K1, K4, K6, K7, S1-S4, B1, B6
Task reference: Block_2_Task_4_Feather_Edging_Filler_Preparation_and_Primer_Readiness

Work completed, findings and recommendations

Knowledge check

1. What is the purpose of feather edging around a repair area?

2. How can poor filler shaping affect the primer and final paint finish?

Knowledge check - continued

3. (a) Why should guide coat or inspection lighting be used before moving on? (b) What defects may appear later if pinholes or low spots are missed?

4. Why must the repair area be cleaned between preparation stages?

5. (a) How should abrasive grades be recorded for traceability? (b) What evidence would prove the panel was ready for primer?

Assessor/Workplace Mentor observation

- ☐ Prepare a repair area using suitable abrasive stages and safe technique.
- ☐ Produce a smooth feather edge without excessive material removal.
- ☐ Check shape, contour, pinholes and low spots before primer work.
- ☐ Record materials, abrasive grades and quality checks accurately.
- ☐ Explain how poor preparation can lead to visible refinish defects.

Assessor/Workplace Mentor observation notes

Decision and feedback
