TASK 3: COLOUR CODE, VARIANT SELECTION AND SPRAY-OUT CARD

Vehicle Damage Paint Technician Level 3 | Block 4 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 43-56**

Your task

A vehicle requires colour confirmation before refinishing. You must locate the colour code, compare variants, produce or prepare a spray-out card process and record colour evidence for the job.

What you must do

1. Locate the vehicle colour code and confirm job-card details.
2. Use the colour retrieval system or formula information to identify variants.
3. Prepare a spray-out card method, or complete it under controlled supervision.
4. Compare the result under suitable lighting and record colour observations.
5. Explain your colour choice, blend recommendation and evidence to the assessor.

What good evidence looks like

SAFE SETUP

Suitable PPE, a prepared work area and controlled vehicle, component or equipment.

CORRECT METHOD

A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE

Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS

Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Vehicle or panel with identifiable colour information
- Paint mixing scheme, formula sheets or colour retrieval system
- Spray-out cards, panels, gun set-up sheet and PPE
- Colour lamp or daylight viewing area where available
- Job card and evidence record

SOW ALIGNMENT

Block 4 - Colour Theory, Paint Mixing and Technical Data
Duties: D4, D5, D7, D10 KSB evidence focus: K1, K3, K6, K8, S3-S5, B4, B7
Task reference: Block_4_Task_3_Colour_Code_Variant_Selection_and_Spray_out_Card

PPE and precautions used

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why must the colour code be confirmed before mixing paint?

2. What is the purpose of a spray-out card?

Knowledge check - continued

3. (a) How can lighting conditions affect colour matching decisions? (b) Why might a vehicle have more than one variant for the same colour code?

4. How can metallic or mica orientation affect colour appearance?

5. (a) What evidence should be kept to justify the colour selection? (b) When would you recommend blending rather than edge-to-edge repair?

Assessor/Workplace Mentor observation

- ☐ Locate and record vehicle colour code information accurately.
- ☐ Prepare a spray-out card process that supports blend and colour decisions.
- ☐ Explain the colour decision clearly using evidence rather than guesswork.
- ☐ Use mixing scheme or technical information to compare colour variants.
- ☐ Record observations about flop, metallic/mica effect or colour mismatch.

Assessor/Workplace Mentor observation notes

Decision and feedback

Decision - select one
