APPRENTICE INSTRUCTIONS

Panel L3 Block 2 - Bolt-on Panel Preparation and Supplementary Damage Check **v1.0**

Task Reference	Block_2_Task_4_Bolt_on_Panel_Preparation_and_Supplementary_Damage_Check_v1.0
Block	Block 2 - Panel Identification, Damage Assessment and Preparation
Weeks	Weeks 17-32
Duties covered	D1-D5, D8, D10
KSBs covered	K1-K5, K8, S1-S3, S5-S7, B1, B2, B5-B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A bolt-on panel is scheduled for removal or replacement. You must prepare the vehicle safely, control fixings, check adjacent panels and identify any supplementary damage before refit or handover.

Objectives

- Prepare a vehicle safely for bolt-on panel work.
- Remove or prepare a bolt-on panel using an organised process.
- Identify hidden or supplementary damage during disassembly.
- Record fastener, clip, corrosion and sealing requirements.
- Prepare clear handover information for MET, paint or supervisor review.

Materials you need at the workstation

- Training vehicle with bolt-on panel
- Trim tools, hand tools, fixings tray and labels
- Gap gauge, straight edge and inspection lamp
- Job card, supplementary damage form and camera/tablet
- PPE and protection materials

APPRENTICE INSTRUCTIONS

Panel L3 Block 2 - Bolt-on Panel Preparation and Supplementary Damage Check **v1.0**

Practical task instructions

1. Confirm the panel to be removed or prepared and protect adjacent areas.
2. Remove fixings methodically, storing clips and fasteners in a labelled system.
3. Inspect hidden areas, mounting points, corrosion protection and adjacent panel condition.
4. Record supplementary damage and identify any effect on the repair plan.
5. Complete the handover record and reinstate or secure the vehicle safely.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 2 - Bolt-on Panel Preparation and Supplementary Damage Check **v1.0**

Technical data and measurements

Panel removed/prepared		Adjacent gap checks	
Fastener condition		Hidden damage found	
Corrosion protection need		ADAS/SRS consideration	
MET/Paint handover		Parts/consumables needed	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why must adjacent panels be protected before bolt-on panel work?

2. What problems can arise from poor fastener control?

3. How should supplementary damage be recorded and communicated?

Knowledge questions continued

4. Why might ADAS or SRS components affect panel removal?

5. What checks confirm that a replacement panel is ready for refit?

6. Why is corrosion protection considered during panel preparation?

7. How does clear handover reduce rework?

Assessor observation notes
