TASK 3: BATTERY AND CHARGING SYSTEM INSPECTION

Autocare Technician Level 2 | Block 2 | v2.1

TIME	EVIDENCE	PROGRAMME POINT
45 minutes	**Practical | Knowledge | Documentation**	**Weeks 11-20**

Your task

A customer reports slow cranking and intermittent starting concerns. You must carry out basic battery and charging system checks, record results and explain whether further work is required.

What you must do

1. Prepare the vehicle and confirm the complaint with the assessor/workplace mentor.
2. Inspect battery security, terminals and visible condition.
3. Measure battery voltage and charging voltage as instructed.
4. Record results and compare with manufacturer or accepted values.
5. Reinstate the vehicle and workstation to a safe, clean condition.

What good evidence looks like

SAFE SETUP

Suitable PPE, a prepared work area and controlled vehicle or equipment.

CORRECT METHOD

A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE

Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS

Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Light vehicle with 12V battery
- Multimeter or battery tester
- Manufacturer technical information
- PPE and battery handling equipment
- Apprentice Assessment Record

SOW ALIGNMENT

Block 2 - Inspection, Servicing and Customer Interaction
Duties: 1, 2, 3, 4, 5, 6 KSB evidence focus: K5-K14, S5-S10, B1, B2
Task reference: Block_2_Task_3_Battery_and_Charging_Check

Task evidence

PPE and precautions used

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why is battery condition checked before replacing starting components?

2. What safety precautions apply when working around batteries?

Knowledge check - continued

3. (a) What can low charging voltage indicate? (b) Why should terminals and earth connections be inspected?

4. How would you explain a weak battery result to a customer?

5. (a) What further checks may be required if the fault remains? (b) What evidence should be recorded for the job card?

Assessor/Workplace Mentor observation

- ☐ Inspect battery condition and security safely.
- ☐ Take relevant electrical measurements using a multimeter or tester.
- ☐ Interpret basic battery and charging results.
- ☐ Record findings using clear documentation.
- ☐ Explain the next steps to the customer or assessor/workplace mentor.

Assessor/Workplace Mentor observation notes

Decision and feedback

Decision - select one

- ○ **PASS**
- ○ **REFER**

Evidence reference

Feedback and action required

Sign-off

Signatures confirm that this is the apprentice's own work and that the evidence and decision are accurate.
