TASK 4: ADAS PRE-CALIBRATION AND SENSOR AWARENESS CHECK

Autocare Technician Level 2 | Block 9 | v2.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 81-94**

Your task

A vehicle has had alignment, tyre or body-related work and may require ADAS checks. You must complete non-invasive pre-calibration checks, record findings and identify whether specialist calibration referral is required.

What you must do

1. Prepare the vehicle and identify visible ADAS features.
2. Carry out pre-checks for tyres, ride height, alignment and visible sensor damage.
3. Record findings and compare with available guidance.
4. Decide whether the vehicle is suitable for calibration or requires correction/referral.
5. Explain the outcome to the assessor/workplace mentor and complete documentation.

What good evidence looks like

SAFE SETUP
Suitable PPE, a prepared work area and controlled vehicle or equipment.

CORRECT METHOD
A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE
Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS
Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Light vehicle or ADAS case-study pack
- Manufacturer guidance or sample calibration report
- Tyre pressure gauge/alignment data where available
- PPE and Apprentice Assessment Record

SOW ALIGNMENT

Block 9 - Emerging Technology, EV and Hydrogen
Duties: 1, 2, 4, 5, 8, 10 KSB evidence focus: K18-K23, S10-S15, B1, B2

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why can alignment affect ADAS calibration?

2. What visible ADAS sensors may be fitted to a vehicle?

Knowledge check - continued

3. (a) Why is calibration specialist work? (b) What pre-checks should be completed before referral?

4. What risks exist if ADAS faults are ignored?

5. (a) How would you explain calibration referral to a customer? (b) What evidence should be included in the job record?

Assessor/Workplace Mentor observation

- ☐ Identify visible ADAS sensor locations and affected systems.
- ☐ Carry out non-invasive pre-calibration checks.
- ☐ Record tyre, ride height and alignment-related evidence.
- ☐ Recognise when specialist calibration is required.
- ☐ Explain safety implications and referral needs.
