TASK 4: ROADSIDE TRIAGE, RISK CONTROL AND RECOVERY DECISION

Heavy Vehicle Service and Maintenance Technician Level 3 | Block 8 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
90 minutes (adapt to workplace conditions)	**Practical | Knowledge | Documentation**	**Weeks 107-117 | Months 28-31**

Your task

Respond to a simulated heavy-vehicle roadside breakdown. Assess scene risk, complete safe triage, communicate with stakeholders and decide whether repair, restricted movement, referral or recovery is appropriate.

What you must do

1. Obtain location, vehicle, load, symptom and immediate-risk information.
2. Complete dynamic scene assessment and establish personal/vehicle protection.
3. Carry out non-intrusive triage within authority and available safe access.
4. Evaluate defect severity, operating limits and recovery/referral options.
5. Communicate the decision and complete a compliant roadside record.

What good evidence looks like

SAFE CONTROL

This is a controlled simulation unless authorised roadside arrangements exist; personal safety and third-party traffic risk take priority over vehicle repair.

CORRECT METHOD

A logical sequence using current manufacturer, DVSA, company and task-specific information.

ACCURATE EVIDENCE

Actual values, test conditions, units, findings and evidence references recorded clearly.

SOUND DECISIONS

A justified serviceability, repair, referral or recovery decision followed by appropriate verification.

You will need

- Roadside scenario or controlled training area
- Vehicle technical and recovery information
- Visibility/scene-control equipment
- Communication device, PPE and roadside record

SOW ALIGNMENT

Block 8 - Advanced Diagnostic Strategy and Roadside Assistance

KSB evidence focus: K11, S10; reinforced K3, K4, K10, S2-S4, S6, S8-S9, S11, B1-B3

Task reference: HV_L3_Block_8_Task_4_Roadside_Triage_Risk_Control_and_Recovery_Decision

Apprentice, location and vehicle details

Apprentice name

Date

Employer / training centre

Vehicle / trailer make and model

Registration / fleet number

Odometer / hours

VIN / chassis / trailer number

Job card / task reference

Measurements and technical checks

Location / road type		Vehicle / load details	
Primary hazards		Controls established	
Triage finding		Operating limit / defect status	
Decision: repair/recover/refer		Contact / record reference	

Special tools, equipment, calibration or technical-information requirements

Task evidence

PPE, precautions and safe-system controls used

Safety-critical findings and immediate action

Work completed, actual findings, diagnosis, recommendations and verification

Knowledge check

1. Why is scene safety reassessed throughout attendance?

2. What information is needed before approaching the vehicle?

Knowledge check - continued

3. Explain the difference between a temporary measure and a repair.

4. When must the vehicle be recovered rather than moved?

5. What information should be communicated and recorded?

Assessor/Workplace Mentor observation

- ☐ Completes a dynamic roadside risk assessment.
- ☐ Limits triage to safe access and personal authority.
- ☐ Communicates and records clearly and promptly.
- ☐ Uses visibility, positioning and exclusion controls.
- ☐ Makes a justified repair/recovery/referral decision.

Assessor/Workplace Mentor observation notes

Decision and feedback

Decision - select one

- ☐ PASS
- ☐ REFER

Evidence reference

Feedback and action required

Sign-off

Signatures confirm that this is the apprentice's own work and that the evidence and developmental decision are accurate.
