## Your task

Use a heavy-vehicle inspection scenario to explain defects and operational risk to a driver/operator, prepare a clear estimate or scope, gain authorisation and update the technical record.

## What you must do

1. Review the job instruction, inspection evidence and customer/operator priorities.
2. Separate confirmed defects, advisory findings and further-diagnosis needs.
3. Explain risk, legal/operational implications and options in plain language.
4. Prepare accurate parts, labour, time and scope information and seek authorisation.
5. Record the discussion, agreed limits, changes and next action.

Actual values, test conditions, units, findings and evidence references recorded clearly.

### SOUND DECISIONS
