TASK 4: MEASUREMENT, TECHNICAL INFORMATION AND PROFESSIONAL HANDOVER

Vehicle Damage Paint Technician Level 3 | Block 1 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 1-10**

Your task

A vehicle component or workshop item requires inspection and accurate recording before specialist route training begins. You must select suitable measuring equipment, interpret the relevant technical information, compare results with the stated tolerance and complete a clear job-card handover.

What you must do

1. Confirm the item, required measurements and technical information with the assessor.
2. Inspect and select suitable measuring equipment, checking its condition and range.
3. Take and record the required measurements using the correct units and safe technique.
4. Compare the results with the specification or tolerance and identify any required action.
5. Complete the job card and give the assessor a clear handover of findings and recommendations.

What good evidence looks like

SAFE SETUP

Suitable PPE, a prepared work area and controlled vehicle, component or equipment.

CORRECT METHOD

A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE

Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS

Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Training vehicle, component, fastener, drawing or workshop measurement item
- Suitable measuring tools and pre-use inspection information
- Technical data, drawing, specification or tolerance information
- Job card, calculation sheet and handover record
- Apprentice Assessment Record

SOW ALIGNMENT

Block 1 - Motor Vehicle Foundation Skills - Shared Controlled Programme
Duties: Controlled Foundation Skills cross-reference - see central mapping KSB evidence focus: Controlled shared mapping and learner record

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why must measuring equipment be checked before it is used?

2. How do units, accuracy and tolerance affect the reliability of a recorded result?

Knowledge check - continued

3. (a) Why should the correct technical information or drawing be confirmed before measurement? (b) What action should be taken when a result is outside the stated tolerance?

4. Why must measurements and calculations be recorded clearly on the job card?

5. (a) What information should be included in a professional workshop handover? (b) How does accurate documentation support safety, quality and specialist-route transition?

Assessor/Workplace Mentor observation

- ☐ Select, inspect and use suitable measuring equipment safely.
- ☐ Interpret technical information, drawings, limits and tolerances.
- ☐ Complete the job card and provide a clear, professional handover.
- ☐ Record measurements using the correct units and an appropriate level of accuracy.
- ☐ Identify results outside specification and state the correct action or escalation.
