TASK 3: FILLER SHAPING, PRIMER APPLICATION AND QUALITY CHECK

Vehicle Damage Paint Technician Level 3 | Block 3 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 29-42**

Your task

A minor damage repair requires filler finishing and primer application. You must shape the repair, prepare for primer, apply or plan primer application under supervision and complete quality checks before handover.

What you must do

1. Check the panel, job card and product data before starting work.
2. Shape the filler/stopper and prepare the surface to the required standard.
3. Mask the area and confirm primer material, ratio, flash-off and safety controls.
4. Apply primer under instruction or complete a supervised set-up and method plan.
5. Inspect the result, identify defects and record rework or next-stage actions.

What good evidence looks like

SAFE SETUP

Suitable PPE, a prepared work area and controlled vehicle, component or equipment.

CORRECT METHOD

A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE

Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS

Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Training panel or repaired panel section
- Filler/stopper, primer surfacer and product data sheets
- Mixing board, spreaders, mixing cups, scales and PPE
- Abrasives, guide coat, masking materials and inspection lamp
- QA checklist and job card

SOW ALIGNMENT

Block 3 - Fillers, Primers, Masking and Corrosion Protection
Duties: D1-D6, D8, D9 KSB evidence focus: K1-K4, K6-K9, S1-S5, B1, B2, B6

PPE and precautions used

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why must filler be mixed and applied according to product data?

2. How can excessive filler thickness affect the repair quality?

Knowledge check - continued

3. (a) Why is flash-off time important during primer application? (b) What causes edge mapping and how can it be prevented?

4. Why should the repair be inspected before moving to colour stages?

5. (a) What records support traceability of primer application? (b) What evidence should be uploaded from this task?

Assessor/Workplace Mentor observation

- ☐ Shape filler or stopper accurately to restore panel contour.
- ☐ Use product data to confirm mixing, flash-off and application requirements.
- ☐ Record all process evidence and any corrective action required.
- ☐ Prepare the area for primer using suitable cleaning, masking and abrasive stages.
- ☐ Carry out quality checks for pinholes, edge mapping and surface defects.
