TASK 3: FULL PAINT REPAIR PLAN, HANDOVER AND QA GATES

Vehicle Damage Paint Technician Level 3 | Block 6 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 72-85**

Your task

A vehicle requires a full paint repair workflow from initial preparation through handover. You must plan the process, identify handover points with panel/MET colleagues and build quality gates into the job.

What you must do

1. Review the job card, damage information, repair area and expected outcome.
2. Plan the sequence of paint operations and identify any dependencies or constraints.
3. Add quality gates for preparation, substrate check, colour, application and final inspection.
4. Prepare a handover note for colleagues or the next stage of repair.
5. Record evidence requirements, risks, delays and customer/update points.

What good evidence looks like

SAFE SETUP

Suitable PPE, a prepared work area and controlled vehicle, component or equipment.

CORRECT METHOD

A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE

Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS

Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Vehicle/job scenario or live training job
- Job card, estimate summary, workflow board and technical data
- QA checklist and evidence matrix
- Communication log or handover sheet
- Apprentice Assessment Record

SOW ALIGNMENT

Block 6 - Process Integration, Productivity and Quality Control
Duties: D1, D5, D8, D9, D10 KSB evidence focus: K5-K9, S1, S3-S5, B1-B7
Task reference: Block_6_Task_3_Full_Paint_Repair_Plan_Handover_and_QA_Gates

Task evidence

PPE and precautions used

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why should a paint repair be planned before work begins?

2. How can poor handover between panel, MET and paint create rework?

Knowledge check - continued

3. (a) What quality gates should be used during a paint repair? (b) How can job planning improve productivity?

4. Why must delays or process changes be recorded?

5. (a) What information should be included in a handover note? (b) How does evidence planning support the apprentice portfolio?

Assessor/Workplace Mentor observation

- ☐ Plan a paint repair sequence from job card to final handover.
- ☐ Identify dependencies with panel, MET, parts, booth time and customer updates.
- ☐ Build quality gates into preparation, application and final inspection stages.
- ☐ Record workflow decisions, evidence requirements and any escalation points.
- ☐ Explain how planning supports productivity, quality and customer trust.
