TASK 3: PLASTIC BUMPER PREPARATION AND ADHESION SYSTEM

Vehicle Damage Paint Technician Level 3 | Block 7 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 86-100**

Your task

A plastic bumper or trim section requires preparation for refinishing. You must identify the plastic, prepare the surface safely, choose the adhesion system and record the controls needed for a durable repair.

What you must do

1. Confirm the plastic component, repair area and required finish.
2. Clean and prepare the surface using product and task guidance.
3. Identify adhesion promoter, primer or flexibility requirements from technical data.
4. Check for contamination, static risk, edge quality and readiness for coating.
5. Record product choices, preparation method, QA findings and evidence references.

What good evidence looks like

SAFE SETUP
Suitable PPE, a prepared work area and controlled vehicle, component or equipment.

CORRECT METHOD
A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE
Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS
Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Plastic bumper/trim section or training panel
- Plastic identification information and product data sheets
- Cleaning materials, abrasives, antistatic cloths and PPE
- Adhesion promoter or primer system information
- QA checklist and job card

SOW ALIGNMENT

Block 7 - Advanced Blending, Plastics and Defect Rectification
Duties: D2-D8, D10 KSB evidence focus: K1-K4, K6, K8, K9, S2-S5, B1, B6, B7
Task reference: Block_7_Task_3_Plastic_Bumper_Preparation_and_Adhesion_System

Knowledge check

1. Why do plastics often need different preparation from metal panels?

2. What is the purpose of adhesion promoter?

Knowledge check - continued

3. (a) How can poor cleaning cause paint failure on a bumper? (b) Why might static control be important on plastic components?

4. How can flexibility requirements affect product choice?

5. (a) What checks show that the bumper is ready for coating? (b) What evidence should support the selected plastic refinish system?

Assessor/Workplace Mentor observation

- ☐ Identify plastic repair/refinish considerations before preparation begins.
- ☐ Clean, abrade and prepare a plastic surface using a controlled process.
- ☐ Select appropriate adhesion promoter, primer or flexible additive where applicable.
- ☐ Recognise contamination and static risks linked to plastic refinishing.
- ☐ Record process evidence and QA checks clearly.

Assessor/Workplace Mentor observation notes

Decision and feedback

Decision - select one
