APPRENTICE INSTRUCTIONS

Panel L3 Block 3 - Door or Wing Remove/Refit and Alignment **v1.0**

Task Reference	Block_3_Task_3_Door_or_Wing_Remove_Refit_and_Alignment_v1.0
Block	Block 3 - Non-Structural Panel Removal, Refit and Alignment
Weeks	Weeks 29-42 (source plan)
Duties covered	D1, D4, D5, D8, D9
KSBs covered	K3, K4, K6, K8, K9, S1, S5-S7, B1, B2, B4, B6, B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A non-structural bolt-on panel requires remove/refit and alignment. You must follow a safe method, control fasteners, set panel gaps and confirm the final fit against adjacent panels.

Objectives

- Remove and refit a bolt-on panel using safe workshop practice.
- Measure and record initial and final gap/flushness readings.
- Use correct fixings, torque discipline and adjustment methods.
- Identify causes of poor alignment or fit.
- Complete a quality check before vehicle release or paint handover.

Materials you need at the workstation

- Training vehicle with door, wing, bonnet or tailgate
- Hand tools, trim tools, torque wrench and fixings tray
- Gap gauges, straight edge and alignment reference data
- Panel protection materials and PPE
- Remove/refit checklist and assessment record

APPRENTICE INSTRUCTIONS

Panel L3 Block 3 - Door or Wing Remove/Refit and Alignment

v1.0

Practical task instructions

1. Record initial panel gaps, flushness and visible alignment concerns.
2. Remove or loosen the panel using the agreed method while controlling all fixings.
3. Refit or adjust the panel until gaps, flushness and latch operation meet the task criteria.
4. Tighten fixings to the required specification and record final measurements.
5. Complete a quality check and explain any remaining adjustment requirements.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 3 - Door or Wing Remove/Refit and Alignment v1.0

Technical data and measurements

Initial front gap		Initial rear gap	
Final front gap		Final rear gap	
Torque setting		Fastener count	
Alignment issue corrected		QA sign-off result	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why are initial gap measurements recorded before adjustment?

2. How can incorrect hinge or mounting adjustment affect panel fit?

3. Why must torque settings and fixings be recorded?

Knowledge questions continued

4. What signs show that a panel is not aligned correctly?

5. How could poor panel alignment affect water sealing or wind noise?

6. What quality checks should be completed before handover?

7. When should alignment issues be escalated for further assessment?

Assessor observation notes
