APPRENTICE INSTRUCTIONS

Panel L3 Block 3 - Bumper Cover, Seals and Quality Gate Inspection **v1.0**

Task Reference	Block_3_Task_4_Bumper_Cover_Seals_and_Quality_Gate_Inspection_v1.0
Block	Block 3 - Non-Structural Panel Removal, Refit and Alignment
Weeks	Weeks 29-42 (source plan)
Duties covered	D1, D4, D5, D8, D9
KSBs covered	K3, K4, K6, K8, K9, S1, S5-S7, B1, B2, B4, B6, B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A bumper cover or trim assembly has been removed and refitted as part of a panel repair. You must check fixings, sensor connections, seals, gap/flushness and final quality before the job moves to the next stage.

Objectives

- Inspect a refitted bumper cover or trim assembly for secure fitment.
- Check clips, brackets, seals and connectors for damage or poor routing.
- Confirm panel gaps, flushness and water/wind-noise risk points.
- Record defects and rectification actions clearly.
- Prepare the vehicle for paint, MET or customer handover.

Materials you need at the workstation

- Training vehicle with bumper/trim assembly
- Trim tools, clip kit, inspection lamp and mirror
- Gap gauge, straight edge and water-test equipment if available
- Job card, quality checklist and camera/tablet
- PPE and protection materials

APPRENTICE INSTRUCTIONS

Panel L3 Block 3 - Bumper Cover, Seals and Quality Gate Inspection **v1.0**

Practical task instructions

1. Check the bumper or trim assembly against the job card and repair stage.
2. Inspect clips, fasteners, brackets, sensor wiring and connector security.
3. Measure gaps and flushness against adjacent panels and check seal condition.
4. Identify defects, record rectification action and explain any safety-system concerns.
5. Complete a final quality gate record with supporting evidence.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 3 - Bumper Cover, Seals and Quality Gate Inspection v1.0

Technical data and measurements

Bumper/trim area		Clip/fixing condition	
Sensor/connector check		Seal condition	
Gap/flushness result		Water leak check	
Wind noise concern		Rectification action	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why are clips and brackets checked after bumper refit?

2. How can sensor wiring be affected during bumper cover removal?

3. What evidence shows that a quality gate check has been completed?

Knowledge questions continued

4. Why should sealing and wind-noise risks be checked before handover?

5. What action should be taken if a connector or bracket is damaged?

6. How can poor trim fit affect customer satisfaction?

7. When might calibration or specialist referral be required after bumper work?
