APPRENTICE INSTRUCTIONS

Panel L3 Block 4 - Technical Data, Material Identification and Repair Method Selection **v1.0**

Task Reference	Block_4_Task_3_Technical_Data_Material_Identification_and_Repair_Method_Selection_v1.0
Block	Block 4 - Materials, Technical Data and Repair-Method Selection
Weeks	Weeks 43-56 (source plan)
Duties covered	D1-D3, D5, D6, D8
KSBs covered	K2, K3, K5, K7, K8, S1-S4, S6-S7, B1, B5-B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A damaged panel requires a method-based repair decision. You must identify the material, locate the correct repair information, record restrictions and select a repair method that follows technical data.

Objectives

- Locate and interpret relevant technical data for panel repair.
- Identify panel material and repair restrictions.
- Select an appropriate repair route based on the method.
- Record heat, joining and corrosion-protection requirements.
- Explain why method discipline is critical on modern vehicles.

Materials you need at the workstation

- OEM repair methods or approved technical information
- Material samples, panel sections or vehicle body diagram
- Repair-method worksheet and job card
- Inspection lamp, magnet where appropriate and PPE
- Camera/tablet for evidence capture

APPRENTICE INSTRUCTIONS

Panel L3 Block 4 - Technical Data, Material Identification and Repair Method Selection **v1.0**

Practical task instructions

1. Confirm vehicle identification and the panel or section to be assessed.
2. Locate the correct repair method, material information and joining instructions.
3. Identify material type, sectioning restrictions and approved joining process.
4. Record any heat, drilling, bonding, corrosion or safety restrictions.
5. Prepare a method-based repair route and explain it to the assessor.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 4 - Technical Data, Material Identification and Repair Method Selection v1.0

Technical data and measurements

Technical data source		Panel material	
Sectioning point		Joining method specified	
Heat limitation		Corrosion protection spec	
PPE/control needed		Method version/date	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why must vehicle identification be confirmed before using repair methods?

2. How can material type affect whether a panel can be repaired?

3. Why are heat restrictions important for high-strength materials?

APPRENTICE INSTRUCTIONS

Panel L3 Block 4 - Technical Data, Material Identification and Repair Method Selection **v1.0**

Knowledge questions continued

4. What could happen if a technician ignores sectioning instructions?

5. How should corrosion protection requirements be recorded?

6. When should a repair method question be escalated?

7. What evidence would prove that technical data was used correctly?

Assessor observation notes

Assessment Declarations

Apprentice declaration: I confirm that the work recorded in this assessment document is my own work and that I completed the task under the conditions stated.

Assessor declaration: I confirm that I have observed and/or reviewed the evidence recorded in this document and that the assessment decision is accurate.
