APPRENTICE INSTRUCTIONS

Panel L3 Block 4 - Joining Process Selection and Method Deviation Record **v1.0**

Task Reference	Block_4_Task_4_Joining_Process_Selection_and_Method_Deviation_Record_v1.0
Block	Block 4 - Materials, Technical Data and Repair-Method Selection
Weeks	Weeks 43-56 (source plan)
Duties covered	D1-D3, D5, D6, D8
KSBs covered	K2, K3, K5, K7, K8, S1-S4, S6-S7, B1, B5-B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A panel joint requires a decision on welding, bonding, riveting or another joining process. You must use the repair method, check access and material requirements, then record any proposed deviation for approval.

Objectives

- Compare joining processes against method and material requirements.
- Select tooling, settings and controls suitable for the joint.
- Identify when a method deviation needs authorisation.
- Complete a clear method deviation or approval record.
- Explain quality and safety risks linked to incorrect joining.

Materials you need at the workstation

- OEM repair method and joining process guidance
- Joining equipment, access diagrams or training joint
- Deviation/approval form and job card
- PPE, extraction and fire-control equipment
- Test-piece or QA checklist

APPRENTICE INSTRUCTIONS

Panel L3 Block 4 - Joining Process Selection and Method Deviation Record v1.0

Practical task instructions

1. Review the specified joining method and the panel joint location.
2. Check access, material type, equipment availability and safety controls.
3. Select the joining process or identify why the specified method cannot be followed.
4. Complete the method deviation or approval record where required.
5. Explain how the joint quality would be checked before final repair.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 4 - Joining Process Selection and Method Deviation Record **v1.0**

Technical data and measurements

Joint location		Original method	
Proposed method		Reason for deviation	
Approval required		Tool/settings required	
Test-piece result		QA check needed	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why must joining-process selection be linked to technical data?

2. What risks are created by using the wrong joining process?

3. When is a method deviation record required?

Knowledge questions continued

4. Who should authorise a deviation from the published repair method?

5. How do access and material type influence joining choices?

6. Why are test pieces used before joining vehicle panels?

7. What checks confirm that a joined panel is suitable for further repair stages?

Assessor observation notes
