APPRENTICE INSTRUCTIONS

Panel L3 Block 5 - Spot Weld Removal and Weld Test Piece Quality Check **v1.0**

Task Reference	Block_5_Task_3_Spot_Weld_Removal_and_Weld_Test_Piece_Quality_Check_v1.0
Block	Block 5 - Welding, Brazing, Bonding and Riveting
Weeks	Weeks 57-71 (source plan)
Duties covered	D1, D3, D5, D6, D8, D9
KSBs covered	K3, K5, K6, K7, K8, K9, S1, S3, S4, S6, S7, B1, B2, B6, B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

You are preparing a training joint for panel replacement. You must remove spot welds without damaging the flange, prepare the joint and complete a weld test piece with quality evidence.

Objectives

- Set up the work area safely for welding-related activity.
- Remove spot welds while protecting the parent panel and flange.
- Prepare a joint or test piece using the correct method.
- Record welding settings, test results and defects.
- Apply extraction, fire watch and PPE discipline throughout.

Materials you need at the workstation

- Welding bay or training bench
- Spot weld drill, grinder and flange preparation tools
- MIG/MAG or resistance spot welding equipment as appropriate
- Weld test pieces, PPE, extraction and fire equipment
- Weld record, QA checklist and camera/tablet

APPRENTICE INSTRUCTIONS

Panel L3 Block 5 - Spot Weld Removal and Weld Test Piece Quality Check **v1.0**

Practical task instructions

1. Complete welding bay safety checks, PPE selection and fire-risk controls.
2. Identify spot weld positions and remove them using the agreed method.
3. Prepare the flange or test piece for the selected weld operation.
4. Set up equipment, complete a practice weld and record the settings.
5. Inspect the test piece, record defects and complete the quality record.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 5 - Spot Weld Removal and Weld Test Piece Quality Check **v1.0**

Technical data and measurements

Weld drill size		Welds removed	
Flange condition		Material thickness	
Welder settings		Plug weld sample	
Destructive test result		PPE/extraction used	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why must a welding area safety check be completed before starting?

2. How can spot weld removal damage the parent panel if carried out poorly?

3. Why are welder settings recorded for test pieces?

Knowledge questions continued

4. What visual defects might indicate a poor plug weld or spot weld?

5. Why is extraction important during welding and grinding work?

6. What action should be taken if a test piece fails quality checks?

7. How does weld evidence support the final repair record?

Assessor observation notes
