APPRENTICE INSTRUCTIONS

Panel L3 Block 5 - Bonding, Riveting and Hybrid Joining Test Piece **v1.0**

Task Reference	Block_5_Task_4_Bonding_Riveting_and_Hybrid_Joining_Test_Piece_v1.0
Block	Block 5 - Welding, Brazing, Bonding and Riveting
Weeks	Weeks 57-71 (source plan)
Duties covered	D1, D3, D5, D6, D8, D9
KSBs covered	K3, K5, K6, K7, K8, K9, S1, S3, S4, S6, S7, B1, B2, B6, B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A repair method specifies bonded and riveted joining. You must prepare a test piece, control surface preparation, apply adhesive, fit rivets and complete a quality record before the process is used on a vehicle.

Objectives

- Prepare surfaces for adhesive bonding using a controlled method.
- Select and fit suitable rivets or mechanical fixings.
- Control adhesive open time, bead size and curing requirements.
- Record product details and process evidence.
- Inspect the completed joint against method and quality requirements.

Materials you need at the workstation

- Bonding and riveting kit
- Panel test pieces or training joint
- Approved adhesive, applicator tips and cleaning products
- PPE, extraction/ventilation and waste controls
- Product data sheet, method sheet and QA record

APPRENTICE INSTRUCTIONS

Panel L3 Block 5 - Bonding, Riveting and Hybrid Joining Test Piece **v1.0**

Practical task instructions

1. Review the method sheet and product data before preparing the joint.
2. Clean, abrade and prepare the surfaces as specified.
3. Apply adhesive, position the joint and fit rivets/fixings in the correct sequence.
4. Record adhesive batch, open time, clamping/curing details and rivet type.
5. Inspect the finished test piece and record any defects or corrective action.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 5 - Bonding, Riveting and Hybrid Joining Test Piece v1.0

Technical data and measurements

Adhesive product		Surface prep method	
Open time		Rivet type	
Clamp/fixture time		Bead size/profile	
Cure time		QA result	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why must adhesive product data be checked before use?

2. How can poor surface preparation affect a bonded joint?

3. Why are open time and cure time recorded?

Knowledge questions continued

4. What problems can occur if the wrong rivet is used?

5. Why must bonding waste and applicator tips be controlled safely?

6. What checks confirm that a hybrid joint is acceptable?

7. When should a bonded or riveted joint be rejected?

Assessor observation notes
