APPRENTICE INSTRUCTIONS

Panel L3 Block 8 - Advanced Material Controls and Aluminium Contamination Prevention **v1.0**

Task Reference	Block_8_Task_3_Advanced_Material_Controls_and_Aluminium_Contamination_Prevention_v1.0
Block	Block 8 - Advanced Materials, Safety Systems and Emerging Technology
Weeks	Weeks 101-114 (source plan)
Duties covered	D1-D3, D5, D6, D8, D10
KSBs covered	K2, K3, K5, K7, K8, S1-S4, S6-S7, B1, B5-B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A modern vehicle contains aluminium, high-strength steel or mixed-material panels. You must identify the material, apply safe contamination controls and decide whether the repair is within your competence or must be referred.

Objectives

- Identify advanced material types and repair boundaries.
- Apply contamination controls for aluminium or mixed-material work.
- Select dedicated tools and cleaning methods where required.
- Record manufacturer warnings and escalation decisions.
- Explain sustainability, waste and safety responsibilities.

Materials you need at the workstation

- Material samples, vehicle panel or technical diagram
- Dedicated aluminium tool set or contamination-control example
- OEM method information and material chart
- Cleaning materials, PPE and waste controls
- Material identification and referral record

APPRENTICE INSTRUCTIONS

Panel L3 Block 8 - Advanced Material Controls and Aluminium Contamination Prevention **v1.0**

Practical task instructions

1. Identify the panel material and any manufacturer repair restrictions.
2. Check whether dedicated tools, cleaning controls or segregation are required.
3. Prepare the work area to prevent cross-contamination and record the controls used.
4. Decide whether the task can continue or needs specialist referral.
5. Complete the material control record and explain your decision.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 8 - Advanced Material Controls and Aluminium Contamination Prevention v1.0

Technical data and measurements

Material type		Dedicated tools used	
Cleaning method		Contamination control	
Repair boundary		OEM warning noted	
Waste control		Escalation decision	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why must advanced materials be identified before repair work starts?

2. How can aluminium contamination affect repair quality and safety?

3. Why might dedicated tools be required for aluminium panels?

Knowledge questions continued

4. What repair limitations may apply to high-strength steel or boron panels?

5. When should mixed-material repairs be referred to a specialist?

6. How do waste and sustainability controls apply to this task?

7. What evidence proves that material controls were followed?

Assessor observation notes

Assessment Declarations

Apprentice declaration: I confirm that the work recorded in this assessment document is my own work and that I completed the task under the conditions stated.

Assessor declaration: I confirm that I have observed and/or reviewed the evidence recorded in this document and that the assessment decision is accurate.
