TASK 4: ADVANCED BLENDING, THREE-STAGE COLOUR AND DEFECT RECTIFICATION

Vehicle Damage Paint Technician Level 3 | Block 7 | v1.1

TIME	EVIDENCE	PROGRAMME POINT
60 minutes	**Practical | Knowledge | Documentation**	**Weeks 86-100**

Your task

A repair requires an advanced blend or complex colour approach. You must plan the blend area, consider metallic, mica or three-stage colour behaviour and identify how finish defects would be rectified.

What you must do

1. Review the colour information, repair position and possible blend areas.
2. Prepare a blend plan showing panel layout, masking strategy and fade-out control.
3. Record how colour, metallic/mica orientation or pearl coat control will be managed.
4. Inspect sample evidence or a finished panel and identify any correction action needed.
5. Explain blend decisions, risks and evidence to the assessor.

What good evidence looks like

SAFE SETUP

Suitable PPE, a prepared work area and controlled vehicle, component or equipment.

CORRECT METHOD

A logical sequence using the relevant procedure and technical information.

ACCURATE EVIDENCE

Actual readings, findings and actions recorded clearly and precisely.

SOUND DECISIONS

Appropriate recommendations, referral or authorisation supported by evidence.

You will need

- Prepared panels, spray-out cards or advanced colour scenario
- Colour formula, variant data and product technical information
- Blend mapping sheet, masking materials and inspection lighting
- Defect examples or QA guide
- Application/evidence record

SOW ALIGNMENT

Block 7 - Advanced Blending, Plastics and Defect Rectification
Duties: D2-D8, D10 KSB evidence focus: K1-K4, K6, K8, K9, S2-S5, B1, B6, B7
Task reference: Block_7_Task_4_Advanced_Blending_Three_stage_Colour_and_Defect_Rectification

Task evidence

PPE and precautions used

Safety-critical findings and immediate action

Work completed, findings and recommendations

Knowledge check

1. Why is blend planning important for modern paint finishes?

2. How can metallic or mica orientation affect colour match?

Knowledge check - continued

3. (a) What additional control is needed for a three-stage pearl finish? (b) Why should spray-out evidence be kept with the job record?

4. What defects are common when blend edges are poorly managed?

5. (a) How should a painter decide whether rectification is needed? (b) What evidence would show an advanced blend was planned correctly?

Assessor/Workplace Mentor observation

- ☐ Plan a blend process using colour evidence and panel layout.
- ☐ Explain control of metallic, mica, pearl or three-stage finishes.
- ☐ Use spray-out or comparison evidence to justify colour decisions.
- ☐ Identify likely defects and rectification options for advanced finishes.
- ☐ Record the process, QA checks and evidence for assessor review.
