APPRENTICE INSTRUCTIONS

Panel L3 Block 10 - EPA Mock Practical - Integrated Panel Repair Scenario **v1.0**

Task Reference	Block_10_Task_3_EPA_Mock_Practical_Integrated_Panel_Repair_Scenario_v1.0
Block	Block 10 - EPA Preparation and Final Assessment Readiness
Weeks	Weeks 145-152
Duties covered	All duties consolidated
KSBs covered	All KSBs revisited and evidenced
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

You are completing a mock EPA-style practical task. You must plan, carry out and evidence an integrated panel repair activity using safe working practice, technical data, quality checks and clear documentation.

Objectives

- Plan a practical panel task against EPA-style expectations.
- Use technical data, safe working and method discipline during the task.
- Generate evidence for practical skills, quality control and behaviours.
- Complete self-assessment and identify improvement actions.
- Prepare for the Month 36 EPA process with realistic practice evidence.

Materials you need at the workstation

- Mock practical task brief and assessment criteria
- Training vehicle, panel, rig or suitable case-study task
- Technical data, tools, PPE and quality checklist
- Portfolio tracker and evidence upload guide
- Assessor observation record

APPRENTICE INSTRUCTIONS

Panel L3 Block 10 - EPA Mock Practical - Integrated Panel Repair Scenario **v1.0**

Practical task instructions

1. Read the practical brief and confirm the expected outcome with the assessor.
2. Plan the task, technical data, tools, PPE and evidence before starting.
3. Complete the practical activity or supervised simulation using safe process discipline.
4. Carry out quality checks and record technical results clearly.
5. Complete the self-assessment, evidence log and improvement action plan.

Apprentice Assessment Record

Technical data and measurements

Practical task selected		Technical data ref	
Panel repair method		Joining/alignment checks	
Quality criteria		Time plan	
Evidence gathered		Self-assessment result	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. How should you prepare before starting an EPA-style practical task?

2. Why must technical data be linked to the practical work completed?

3. What behaviours should be demonstrated during the mock task?

Knowledge questions continued

4. How do quality checks support a first-time-right outcome?

5. What evidence should be uploaded after the practical task?

6. How can self-assessment improve EPA readiness?

7. What action would you take if the task moved outside safe competence boundaries?

Assessor observation notes
