APPRENTICE INSTRUCTIONS

Panel L3 Block 2 - Damage Assessment and Repair Planning **v1.0**

Task Reference	Block_2_Task_3_Damage_Assessment_and_Repair_Planning_v1.0
Block	Block 2 - Panel Identification, Damage Assessment and Preparation
Weeks	Weeks 17-32
Duties covered	D1-D5, D8, D10
KSBs covered	K1-K5, K8, S1-S3, S5-S7, B1, B2, B5-B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A customer vehicle has visible accident damage to an outer panel. You must assess the damage, use technical information, decide whether repair or replacement is appropriate and prepare a repair-plan recommendation.

Objectives

- Assess visible panel damage using a structured routine.
- Use technical data to inform repair-versus-replace decisions.
- Identify safety systems, materials and possible supplementary damage.
- Record labour, parts and authorisation requirements.
- Communicate repair recommendations clearly and professionally.

Materials you need at the workstation

- Damaged vehicle, panel or training rig
- OEM repair methods or technical data access
- Damage assessment sheet and job card
- Inspection lamp, straight edge and measuring equipment
- PPE and camera/tablet for evidence

APPRENTICE INSTRUCTIONS

Panel L3 Block 2 - Damage Assessment and Repair Planning

v1.0

Practical task instructions

1. Confirm the customer concern, job card and vehicle identification details.
2. Inspect the damaged panel and surrounding areas for visible and hidden concerns.
3. Check relevant repair methods, panel material and safety-system restrictions.
4. Decide whether the panel should be repaired, replaced or escalated for further assessment.
5. Complete the damage assessment record and explain your recommendation to the assessor.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 2 - Damage Assessment and Repair Planning

v1.0

Technical data and measurements

Panel or area assessed		Damage type	
Repair/replace decision		OEM method reference	
Estimated labour		Parts required	
Safety systems affected		Authorisation required	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. What factors influence a repair-versus-replace decision?

2. Why must manufacturer repair methods be checked before planning panel work?

3. How can supplementary damage change the repair plan?

Knowledge questions continued

4. Why is customer or insurer authorisation required before additional work starts?

5. What evidence would support your damage assessment decision?

6. How can material type affect the repair method chosen?

7. What information should be communicated to the wider repair team?

Assessor observation notes
