APPRENTICE INSTRUCTIONS

Panel L3 Block 6 - Panel Pulling and Metal Finishing

v1.0

Task Reference	Block_6_Task_3_Panel_Pulling_and_Metal_Finishing_v1.0
Block	Block 6 - Panel Repair, Pulling, Filler Finishing and Quality Control
Weeks	Weeks 81-96
Duties covered	D1, D4-D6, D8, D9
KSBs covered	K3, K4, K6, K8, K9, S1, S5-S7, B1, B2, B6, B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A damaged panel requires controlled dent reduction before finishing. You must inspect the damage, plan a pulling approach, reduce the dent and record the contour and quality checks completed.

Objectives

- Assess panel damage and plan a safe pulling or repair approach.
- Use suitable pulling and metal-finishing tools under supervision.
- Reduce damage while protecting panel shape and material integrity.
- Check contour, high/low spots and repair quality.
- Record remaining defects and next repair-stage requirements.

Materials you need at the workstation

- Damaged panel, training panel or repair vehicle
- Pulling equipment, hammer/dolly set and contour tools
- Straight edge, guide coat or profile gauge
- PPE, extraction and workshop protection equipment
- Panel repair checklist and evidence log

APPRENTICE INSTRUCTIONS

Panel L3 Block 6 - Panel Pulling and Metal Finishing

v1.0

Practical task instructions

1. Inspect the panel, identify damage type and record initial condition.
2. Plan pulling points, access, tool choice and safety controls.
3. Carry out controlled dent reduction or metal finishing as instructed.
4. Check panel contour using suitable tools and visual/tactile inspection.
5. Record the final condition, remaining defects and next steps.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 6 - Panel Pulling and Metal Finishing v1.0

Technical data and measurements

Damage area		Pulling method	
Access/anchor points		Initial high/low spots	
Heat used/avoided		Contour check method	
Final straightness		Remaining defect	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why is damage type assessed before selecting a pulling method?

2. How can excessive force or heat affect panel repair quality?

3. Why should high and low spots be checked during metal finishing?

Knowledge questions continued

4. What evidence shows that the contour has been checked properly?

5. When should a panel be replaced rather than repaired?

6. How does panel finishing affect paint preparation?

7. What safety controls are needed when using pulling equipment?

Assessor observation notes
