APPRENTICE INSTRUCTIONS

Panel L3 Block 7 - Underbody Measurement and Misalignment Report **v1.0**

Task Reference	Block_7_Task_3_Underbody_Measurement_and_Misalignment_Report_v1.0
Block	Block 7 - Structural Measurement, Jig Systems and Chassis Alignment
Weeks	Weeks 97-112
Duties covered	D1-D3, D5, D7, D8, D9
KSBs covered	K1, K2, K3, K5, K6, K8, K9, S1, S3, S6-S8, B1, B2, B6, B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A vehicle has suspected structural misalignment after impact. You must use datum information, take underbody or chassis measurements and complete a misalignment report for supervisor review.

Objectives

- Prepare the vehicle and measuring area safely.
- Use technical data to identify datum points and target measurements.
- Take and record measurements using an approved process.
- Identify deviations and possible impact paths.
- Complete a clear misalignment report and escalation recommendation.

Materials you need at the workstation

- Vehicle, body shell or structural measuring rig
- Measuring system, tram gauge or jig data
- Technical data and datum sheets
- PPE, lifting/support equipment and safety checklist
- Misalignment report and camera/tablet

APPRENTICE INSTRUCTIONS

Panel L3 Block 7 - Underbody Measurement and Misalignment Report **v1.0**

Practical task instructions

1. Confirm the measuring method, datum data and safe vehicle support before starting.
2. Identify the datum points and record target measurements from technical data.
3. Take measurements carefully and compare them with specification.
4. Record deviations, possible causes and any immediate safety concerns.
5. Present the misalignment report and recommended next action to the assessor.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 7 - Underbody Measurement and Misalignment Report v1.0

Technical data and measurements

Datum data source		Datum point A target	
Datum point A actual		Datum point B target	
Datum point B actual		Maximum deviation	
Likely impact path		Escalation action	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why must datum data be confirmed before structural measurement?

2. How can poor vehicle support affect measurement accuracy?

3. What does a measurement deviation indicate?

Knowledge questions continued

4. Why should impact direction be considered during assessment?

5. When should structural misalignment be escalated?

6. How does accurate measurement protect vehicle safety?

7. What evidence should be included in a misalignment report?

Assessor observation notes

Assessment Declarations

Apprentice declaration: I confirm that the work recorded in this assessment document is my own work and that I completed the task under the conditions stated.

Assessor declaration: I confirm that I have observed and/or reviewed the evidence recorded in this document and that the assessment decision is accurate.
