APPRENTICE INSTRUCTIONS

Panel L3 Block 7 - Jig Setup, Controlled Pull Plan and Post-Check v1.0

Task Reference	Block_7_Task_4_Jig_Setup_Controlled_Pull_Plan_and_Post_Check_v1.0
Block	Block 7 - Structural Measurement, Jig Systems and Chassis Alignment
Weeks	Weeks 97-112
Duties covered	D1-D3, D5, D7, D8, D9
KSBs covered	K1, K2, K3, K5, K6, K8, K9, S1, S3, S6-S8, B1, B2, B6, B7
Estimated duration	60 minutes
Assessment type	Practical / knowledge / documentation

Scenario

A vehicle or training structure is being set up for controlled realignment. You must identify mounting points, prepare a jig or bench setup, plan a pull and record post-check measurements.

Objectives

- Set up measuring or jig equipment using safe working practice.
- Identify mounting, clamping and anchoring requirements.
- Prepare a controlled pull plan from measurement evidence.
- Record post-pull or post-setup checks accurately.
- Explain quality and safety limits during structural realignment.

Materials you need at the workstation

- Jig, bench system or training alignment rig
- Clamps, brackets, pulling equipment and safety chains
- Manufacturer data, set-up sheet and measuring record
- PPE, exclusion zone controls and inspection equipment
- Controlled pull plan and QA checklist

APPRENTICE INSTRUCTIONS

Panel L3 Block 7 - Jig Setup, Controlled Pull Plan and Post-Check **v1.0**

Practical task instructions

1. Check the jig or bench system, PPE and exclusion controls before setup.
2. Identify mounting points, clamps and brackets using the data provided.
3. Prepare a controlled pull plan based on the measured deviation.
4. Carry out a simulated or supervised set-up/post-check activity as instructed.
5. Record post-check results and explain whether the repair can progress.

Apprentice Assessment Record

Vehicle make		Mileage	
Vehicle model		Chassis number	
Vehicle reg		Job card number	
Panel / area		Apprentice group	

Brief description of work carried out and any further recommendations

PPE worn, special precautions and safety controls used

Photographic evidence, job-card or portfolio reference

APPRENTICE INSTRUCTIONS

Panel L3 Block 7 - Jig Setup, Controlled Pull Plan and Post-Check v1.0

Technical data and measurements

Jig/bench used		Mounting points	
Clamp/fixing check		Initial measurement	
Pull plan direction		Post-check measurement	
Stress relief check		QA approval	

Special tools, technical data, calibration, material controls or method references

Knowledge questions

1. Why are mounting points and clamps checked before pulling?

2. How does pull direction relate to impact damage and measurement evidence?

3. What safety controls are required around pulling equipment?

Knowledge questions continued

4. Why are post-check measurements needed?

5. What could happen if the structure is pulled beyond specification?

6. When should the pull plan be stopped and reviewed?

7. How does this record support EPA practical readiness?

Assessor observation notes

Assessment Declarations

Apprentice declaration: I confirm that the work recorded in this assessment document is my own work and that I completed the task under the conditions stated.

Assessor declaration: I confirm that I have observed and/or reviewed the evidence recorded in this document and that the assessment decision is accurate.
